TOWNSHIP OF LOWER ALLOWAYS CREEK
RESOLUTION 2019-46

A RESOLUTION TO COMMIT TO THE IDEALS AND PRINCIPLES OF "COMPLETE
STREETS" BY ESTABLISHING A STRATEGY OF CREATING STREET CORRIDORS
THAT ACCOMMODATE ROAD USERS OF ALL AGES AND ABILITIES

WHEREAS, the Township of Lower Alloways Creek ("Township") is committed to
creating street corridors that accommodate all road users of all ages and abilities for all trips;
and,

WHEREAS, a Complete Street is defined as a means of providing safe access for all
users, including pedestrians, bicyclists, transit vehicle users, and motorists, by designing and
operating a comprehensive, integrated, equitable, connected multi-modal network of
transportation options; and,

WHEREAS, the benefits of Complete Streets include:
i) improving safety for pedestrians, bicyclists, children, older citizens, families, non-drivers, the
mobility-challenged and other non-vehicular users of the roadway, as well as those who cannot
afford a motor vehicle or choose to live motor vehicle free;
ii) providing connections to bicycling and walking trip generators such as employment, schools,
residential, recreation, transit, retail centers, public and civic facilities;
iii) promoting healthy lifestyles and increasing social connectivity and sense of community
belonging;
iv) creating more livable and walkable communities;
v) reducing traffic congestion and reliance on carbon fuels thereby reducing greenhouse gas
emissions and improving air quality, water quality and storm water management;
vi) saving money by incorporating sidewalks, on-streets bicycle facilities, safe and convenient
crossings and transit amenities into the initial design of a project, thus sparing the expense of
retrofits later; and,
vii) stimulating economic prosperity through enhanced access to local businesses, increased
property values and employment, and private investment, especially in retail districts,
downtowns and tourist areas; and,

WHEREAS, the Mayor and Committee fully support these initiatives and wish to
reinforce their commitment to creating a balanced, flexible, comprehensive, integrated,
connected street network that accommodates all road users of all ages and abilities and for all
trips. Implementation efforts of a Complete Streets policy will ensure the fair treatment,
equitable funding and resource distribution, and meaningful involvement of all communities in
all phases from selection, planning, and design to construction and long-term maintenance; and,

WHEREAS, a Complete Streets policy will be implemented through the planning,
design, construction, maintenance, and operation of new and retrofit transportation facilities for
the entire right-of-way.

WHEREAS, complete streets have the potential for improving physical and mental
health either directly or indirectly in the following ways:
a. Incorporating physical activity into our daily lives by increasing pedestrian activity and bicycle use.

b. Reducing rates of several chronic diseases related to decreases in physical activity by accommodating walking and bicycling. Key impacted diseases include diabetes, heart disease, depression, and some cancers.

c. Reducing rates of injury and death from traffic crashes by improved road safety for all users.

d. Reducing rates of asthma and other respiratory issues due to improved air quality through emissions reductions and vegetative air filtration.

e. Multiplying health and wellness benefits resulting from improved access to necessary amenities for vulnerable populations.

f. Reducing the risk of illnesses related to water-borne pathogens resulting from improved storm water infiltration.

g. Increasing the sense of social connectivity & sense of community belonging.

h. Improving aesthetics through decorative and functional vegetation.

i. Recognizing that flexibility and community context are needed when addressing the needs of pedestrians, bicyclists, public transit, and motorists.

NOW, THEREFORE, BE IT RESOLVED by the Mayor and Committee of the Township of Lower Alloways Creek, that all public street projects, both new construction and reconstruction in the Township of Lower Alloways Creek shall be designed and constructed using Complete Streets policies where practical and safe. Complete Streets accommodates travel by pedestrians, bicyclists, and motorized vehicles and their passengers.

BE IT FURTHER RESOLVED that the Planning Board, Zoning Board of Adjustment, and the Township Engineer should make Complete Streets practices and principles a standard part of everyday operations including planning and design studies, should approach every transportation project and program as an opportunity to improve public streets, public health, and the transportation network in the Township for all users, and should work in coordination with other departments, agencies, and jurisdictions including public health to achieve robust Complete Streets;

BE IT FURTHER RESOLVED that the Complete Streets policy as set forth above shall be implemented where practical and safe as follows:

a. All Township streets shall be designed and constructed to include accommodations for pedestrians, bicyclists, public transit, and motorists. Complete Streets shall accommodate users of all ages and abilities.

b. Recognizing the inter-connected multi-modal network of street grid, the Township will work with Salem County and state agencies through existing planning efforts to ensure Complete Streets principles are incorporated in a context sensitive manner.
c. While Complete Streets principles are context sensitive, these features should be considered during the design, planning, maintenance and operations phases and incorporate changes into some retrofit and reconstruction projects. Departments shall reference current editions and best practices of New Jersey Roadway Design Manual; the AASHTO Guide for the Development of Bicycle Facilities; AASHTO Guide for the Planning, Design and Operation of Pedestrian Facilities; the Manual of Uniform Traffic Control Devices; the NACTO Urban Bikeway Design Guide and other design criteria as necessary, striving to balance all needs, when repaving or reconstructing streets.

d. The Combined Planning Board / Zoning Board of Adjustment, along with their respective planning and engineering professionals, shall incorporate this Complete Streets policy into its reviews and recommendations of major site plan and development/redevelopment projects; that all initial planning and designing studies, environmental reviews and other project reviews for projects requiring funding or approval by the Township should (a) evaluate the effect of the proposed project on safe travel by all users, and (b) identify measures to mitigate any adverse impacts on such travel that are identified.

1. To facilitate timely implementation of the Complete Streets policy, the following steps shall be taken:

   Within two years of the effective date of this Policy, the Township shall inventory, audit, and modify its procedures, policies, documents, training programs, performance measures and other guidance documents. This includes but is not limited to funding, planning, design, operating and maintaining transportation infrastructure.

   a. A new policy will be distributed to all department heads and appropriate consultants within 90 days of adoption of this resolution.

   b. At least one training session about Complete Streets will be attended by appropriate staff and consultants of the Township within one year of adoption of this resolution.

   c. Implementation and oversight of the new policy will be handled by the Township Manager, or such other person designated by the Township Manager and/or Township Committee.

2. The Township shall provide a good faith effort to collect, track, and monitor data to determine compliance with the Township's complete street policy using the following benchmarks:

   a. Mileage by of new and existing bicycle infrastructure including in communities of concern (e.g., bicycle lanes, bike parking, paths, and boulevards)

   b. Linear feet (or mileage) of new and existing pedestrian infrastructure (e.g., sidewalks, trails, transit amenities, etc.)
c. Number of new and existing ADA-compliant infrastructure (e.g. curb ramps, pedestrian buttons, etc.)

d. Number of new street trees

e. Number of green street practices (e.g., rain gardens, bio swales, permeable pavement, etc.)

f. Number of pedestrian and bicycle lighting improvements

g. Bicycle and pedestrian counts

h. Commute mode percentages (e.g., drive alone, carpool, transit, bicycle, and walk)

i. The number and percentage of designated transit stops accessible via sidewalks and curb ramps

j. The number and locations of motor vehicle crashes that are disproportionately above the average for the Township, the number and locations of all fatalities within the Township, and the location and causes (when they can be determined) for all motor vehicle crashes that involve pedestrian(s) and bicyclists anywhere in the township

k. The total number and percentage of children walking or bicycling to school

3. A transportation project shall not be required to accommodate the needs of a particular user group if the Township Committee or their designee in consultation with the Township Engineer determines in writing that:

a. The use of the transportation facility by the particular user group is prohibited by law or would create an unsafe condition;

b. There is a demonstrated absence of both a current and future need to accommodate the category of user (absence of future need may be shown via demographic, school, employment, and public transportation route data that demonstrate, for example, a low likelihood of bicycle, pedestrian, or transit activity in an area over the next 20 years);

c. The adverse impacts of accommodating the needs of the particular user group significantly outweigh the benefits.

d. Non-motorized users are prohibited by law on the roadway or project area.

e. Bicycle and pedestrian facilities are not required where they are prohibited by law or would create unsafe conditions.

f. Scarcity of population, travel and attractors, both existing and future, indicate an absence of need for such accommodations.
g. When the cost of incorporating new bicycle, pedestrian, and/or public transit facilities is excessive, defined as greater than 20% of the overall project cost, the need for and/or probable use of the facility shall be considered in making the determination as to whether or not an exception should be approved at this time or held for future consideration. This determination may occur during the budget and capital improvements program approval process or when project plans and specifications are being prepared.

h. The safety of a project is compromised by the inclusion of Complete Streets.

4. In any project, should the inclusion of pedestrian, public transit, and/or bicycle facilities prove detrimental to wetlands, floodplains, streams and/or historic/social resources, as determined by the Township Engineer, those facilities shall not be approved. Transportation projects shall consider sustainable design elements, including, but not limited to:

   a. Green storm water infrastructure practices
   b. Traffic Calming
   c. Shade trees and other vegetation
   d. Permeable pavements - including those made from recycled materials such as rubber, concrete, glass, and plastic

BE IT FURTHER RESOLVED that this resolution shall remain on file in the Township Clerk's Office and a copy be provided to the Township Public Works Department, Township Engineer, Salem County Freeholders, Salem County Division of Public Works and New Jersey Department of Transportation and New Jersey Transit.

ATTEST:

FOR LOWER ALLOWAYS CREEK TOWNSHIP

Ronald L Campbell Sr. Clerk

Mayor
