REV. ORD. 06/2019

PREFACE

The Township of Lower Alloways Creek has passed through the struggles that characterize all American communities in their early history. While only a few simple laws were necessary at the time of the incorporation of the township, subsequent growth of the community, together with the complexity of modern life, has created the need for more and detailed ordinances for the proper function and government of the township. The recording of local law is an aspect of municipal history, and as the community develops and changes, review and revision of old laws and consideration of new laws, in the light of current trends, must keep pace. The orderly collection of these records is an important step in this ever-continuing process. Ordinances must be more than mere chronological enactments reposing in the pages of old records. They must be available and logically arranged for convenient use and must be kept up-to-date. It was with thoughts such as these in mind that the Township Committee ordered the following codification of ordinances.

Contents of Code

The various chapters of the Code contain all currently effective ordinances of a general and permanent nature enacted by the Township Committee of the Township of Lower Alloways Creek. In accordance with recognized codification procedures, any revisions or amendments made in existing ordinances in the course of the codification, upon authorization of the Township Committee, are referred to in the ordinance adopting the Code and are adopted thereby.

Reserve Chapters

Space has been provided for the convenient insertion, alphabetically, of later enactments. In the Table of Contents such space appears as chapters titled "(Reserved)". In the body of the Code, reserved space is provided by breaks in the page-numbering sequence between chapters.

Division of Code

The Code is divided into parts. Part I, Administrative Legislation, contains all township ordinances of an administrative nature, namely, those dealing with the administration of government, those establishing or regulating municipal departments and those affecting officers and employees of the municipal government and its departments. Part II, General Legislation, contains all other township ordinances of a regulatory nature. Ordinances in this part generally impose penalties for violation of their provisions, whereas those in Part I do not.

Grouping of Ordinances and Arrangement of Chapters

The ordinances are organized into chapters, their order being an alphabetical progression from one subject to another. Wherever there are two or more ordinances dealing with the same subject, they are combined into a single chapter. Thus, for example, all ordinances pertaining to dogs and other animals in the township may be found in Part II, in the chapter entitled "Dogs and Other Animals." In such chapters, the use of Article designations has preserved the identity of the individual ordinances.

Table of Contents

The Table of Contents details the arrangement of material by chapter as a means of identifying specific areas of legislation. Wherever two or more ordinances have been combined by the editors into a single chapter, titles of the several Articles are listed beneath the chapter title in order to facilitate location of the individual ordinances.

Pagination

A unique page-numbering system has been used, in which each chapter forms an autonomous unit. One hundred pages have been allotted to each chapter, and the first page of each is the number of that chapter followed by the numerals "01." Thus, Chapter 8 begins on page 801, Chapter 78 on page 7801, etc. By use of this system, it is possible to add or to change pages in any chapter without affecting the sequence of subsequent pages in other chapters, and to insert new chapters without affecting the existing organization.

Numbering of Sections

A chapter-related section-numbering system is employed, in which each section of every ordinance is assigned a number which indicates both the number of the chapter in which the ordinance is located and the location of the section within that chapter. Thus, the first section of Chapter 8 is § 8-1., while the sixth section of Chapter 99 is § 99-6.

Scheme

The Scheme is the list of section titles which precedes the text of each chapter. These titles are carefully written so that, taken together, they may be considered as a summary of the content of the chapter. Taken separately, each describes the content of a particular section. For ease and precision of reference, the Scheme titles are repeated as section headings in the text.

Chapter Histories

At the end of the Scheme in each chapter is located the legislative history for that chapter. This History indicates the specific ordinance source from which the chapter was derived, including the ordinance number and the date of adoption. In the case of chapters containing Articles derived from more than one ordinance, the source of each Article is indicated in the History.

Amendments and Revisions

Ordinance sections amended or revised at the time of this codification are specifically enumerated in chapter Histories with reference to "Ch. 1, General Provisions, Art. I," where the ordinance adopting this Code and making these revisions will appear after final enactment. Sections so amended or revised are also indicated in the text by means of editor's notes referring to the chapter cited above. The history of other amendments to each chapter appears where pertinent in the text.

General References

In each chapter containing material related to other chapters in the Code, a table of General References is included to direct the reader's attention to such related chapters.

Appendix

Certain forms of local legislation do not fall into the categories as established for Parts I and II of the Code but are of such significance that their application is community-wide or their provisions are germane to the conduct of municipal government. The Appendix of this Code is reserved for such legislation and for any other material that the community may wish to include.

Index

The Index is a guide to information. Since it is likely that this Code will be used by persons without formal legal training, the Index has been formulated to enable such persons to locate a particular section quickly. Each section of each chapter has been indexed. The Index should be supplemented and revised from time to time as new legislation is added to the Code.

Supplementation

Supplementation of the Code will follow the adoption of new legislation. New ordinances and amendments will be included and repeals will be indicated as soon as possible after passage.

Acknowledgment

We gratefully acknowledge the assistance given the process of codification by Mayor Samuel E. Donelson and all the members of the Township Committee. Special acknowledgment is due and accorded Mary O. Henderson, Township Clerk, who cheerfully added the duties of coordinating communications to her already pressing municipal tasks, and to Township Attorney Raymond J. Zane for his cordial attentiveness to the tasks necessary to complete the Code of the Township of Lower Alloways Creek. Their wholehearted dedication has made it an outstanding achievement of a modern community.

The codification of the ordinances of the Township of Lower Alloways Creek reflects an appreciation of the needs of a progressive and expanding community. As in many other municipalities, officials are faced with fundamental changes involving nearly every facet of community life. Problems increase in number and complexity, and range in importance from everyday details to crucial areas of civic planning. It is the profound conviction of General Code Publishers Corp. that this Code will contribute significantly to the efficient administration of local government. As Samuel Johnson observed, "The law is the last result of human wisdom acting upon human experience for the benefit of the public."

A. Eligibility. Sick leave shall only be available to full-time permanent employees and salaried employees, except for members or employees of the Police Department who are covered by other plans. Seasonal or part-time employees shall not receive sick leave.

B. Definition. "Sick leave" is paid leave that may be granted to each full-time employee and salaried employee who is unable, due to his or her own sickness or injury, to perform the duties of his or her position or who is quarantined by a physician because he or she has been exposed to a contagious disease. Employees whose absences are due to sickness or injury compensable under state workers' compensation laws will not be charged with sick leave.

C. Number of days allowed. Eligible employees may use up to a maximum of ten (10) days as sick days per calendar year. The sick days shall be deemed available in full at the beginning of each calendar year. If an employee is hired mid-year, he or she shall be entitled to a pro rata share of the total sick days allowable for one (1) year, as computed from the date of successful completion of the Introductory period. There will be no carry-over or accumulation of unused sick days from year to year.

D. Doctor's certificate.

(1) After taking three (3) days of sick leave within any seven-day period, an eligible employee is required to present a doctor's certificate before returning to work, stating the nature of the illness and affirming the employee's fitness to return to work. In the case of a contagious disease or exposure to the same, a certificate from the County Department of Health shall be required. Other evidence to validate an employee's sick leave may be required at the discretion of the department head.

(2) Additionally, an eligible employee is required to present a doctor's certificate before returning to work for any sick leave absence after the employee's second incidence of sick leave in any calendar year. [An "incidence" of sick leave is defined as any one (1) continuous absence from work pursuant to this section.] The employee will be required to present a doctor's certificate before returning to work for each and every subsequent sick leave absence, no matter the duration, until he or she has completed twelve (12) consecutive months without a sick leave absence.

E. Notification required. An eligible employee taking sick leave is required to notify his or her immediate supervisor of the absence as close to the beginning of the workday as possible. If the immediate supervisor is unavailable, notification should be given to the person in charge of the employee's department. The employee is required to inform the supervisor or department head of the absence for each day of sick leave taken.

F. Unauthorized absence. An employee who is absent from duty without reporting to his or her supervisor prior to said absence, and in no case for more than twenty-four (24) hours after the time he or she would normally report to work, will be considered absent without leave, and a deduction of pay will be made for such absence. In the discretion of the Township Committee, such absence will be grounds for disciplinary action, up to and including immediate dismissal. The use of sick leave for reasons other than those stated in Subsection B shall also be grounds for disciplinary action, up to and including termination.

*Editors Note: Former § 40-13, Disability pay, was deleted 10-5-1993 by Ord, No, 93-20. See now § 40- 3.1 , Disability leave and regulations.

If an employee who has already reported for duty is required to leave his or her duty for any of the reasons set forth in Subsection B above prior to the completion of one-half (1/2) days work, said employee will be charged one (1) full sick day. If the employee has completed more than one-half (1/2) day's duty before being required to leave, he or she shall be charged one-half (1/2) day's sick leave for that particular day.

§ 40-13.1. Disability leave and regulations. [Added 10-5-1993 by Ord. No. 93-20]

A. Plan adopted. The Township of Lower Alloways Creek hereby adopts a self-funded disability benefit plan for certain employees of the township. This plan does not cover members or employees of the Police Department, for whom other plans are in effect. All previous ordinances, plans or other written policies concerning disability benefits for township employees are hereby rescinded and will hereafter be considered null and void.

B. Compensible disability. Disability shall be compensible, subject to the limitations of this section, where a covered individual suffers a serious accident, illness or hospitalization at the onset of which it can be medically certified that the employee is expected to be out of work for at least two (2) weeks. Said accident, illness or hospitalization shall not arise out of or in the course of the individual's employment or if so arising not compensible under the state Workers' Compensation Law, Occupational Disease Law or other similar law and resulting in the individual's total inability to perform the duties of employment.

C. Covered individual. A covered individual under the plan set forth herein is any person who:

- (1) Has been employed by the township on either an hourly or salaried basis for a minimum of twelve (12) months; and
- (2) Is a full-time, permanent (non-seasonal) employee or salaried official; and
- (3) Has used up all available sick leave.

D. Duration. Benefits under this plan shall be payable from the first day for which there is no sick leave coverage available and for each day thereafter that the disability continues up to a maximum of twenty-six (26) weeks.

E. Benefits paid. A covered individual under this plan shall receive his or her full pay for the period of disability. "Full pay" is considered his or her weekly wage, based on a forty- hour week, at the time the disability occurs.

F. Limitation of benefits. In addition to the foregoing limitations set forth in this plan, no benefits shall be payable to any person:

- (1) For any period during which the claimant is not under the care of a legally licensed physician, dentist, optometrist, podiatrist, practicing psychologist or chiropractor who, when requested by the township, shall certify within the scope of the practitioner's practice the disability of the claimant, the probable duration thereof and, where applicable, the medical facts within the practitioner's knowledge.
- (2) For any period of disability due to willfully and intentionally self-inflicted injury or to injury sustained in the perpetration by the claimant of any crime.
- (3) For any period during which the claimant performs any work for remuneration or profit.
- (4) In a weekly amount which, together with any remuneration the claimant continues to receive from the township, would exceed the weekly wage immediately prior to disability.

G. Non-duplication of benefits.

(1) No benefits shall be required or paid under this plan for any period during which benefits are paid or payable under:

(a) Any unemployment compensation or similar law.

(b) Any disability or cash sickness benefit or similar law of New Jersey, any other state or the federal government.

(c) Any Workers' Compensation Law, occupational disease law or similar legislation of New Jersey, any other state or the federal government, except where said benefits are for permanent partial or permanent total disability previously incurred.

(2) Where a claimant's claim for compensation under the laws or legislation set forth in Subsection G (1) (b) or (c) above is delayed, benefits will be paid under this plan; however, in the event that any such benefits are awarded under said laws or legislation for the same time period during which benefits were paid under this plan, the township shall be entitled to be subrogated to such claimant's award to the extent of the amount of disability payments made hereunder.

H. Procedures. (1) In the event of the disability of any individual covered under this plan, that individual shall, no later than the first day following the exhaustion of his or her sick leave, notify the township of said disability, whereupon the township will provide the individual with the necessary forms and/or instructions for filing a notice and claim for benefits under this plan. Said notice and claim shall be filed with the township by the individual according to the instructions given not later than twenty (20) days after the commencement of the period of disability for which the notice is furnished. Said notice and claim must be accompanied by medical proof, which shall include certification of total disability by the attending physician or a record of hospital confinement. Failure to furnish notice and proof within the time or in the manner provided above shall not invalidate or reduce any claim if it shall be shown to the satisfaction of the township not to have been reasonably possible to furnish such notice and proof and that such notice and proof was furnished as soon as reasonably possible.

(2) A person claiming benefits under this plan shall submit, at intervals not more than once a week, proof of continuing total disability as requested by the township and/or submit to an examination by a health-care professional designated by the township. Any such examinations shall be scheduled at a reasonable time and place and, if the claimant so requests, by a professional of the same sex. Refusal to comply with this section shall disqualify the claimant from all benefits for the period of disability for which proof is being requested.

(3) All medical records in the possession of the township, except to the extent necessary for proper administration of benefits, shall be confidential and shall not be published or open to public inspection in any manner revealing the identify of the claimant or the nature of the disability or cause of the disability. Only the Superintendent of Public Works, the Township Clerk and members of the Township Committee shall have access to medical reports.

I. Review. If a person claiming benefits under this plan and the township are unable to agree as to the claimant's eligibility for benefits under this plan, such claimant may, within thirty (30) days of receipt of notice that benefits were denied, file a complaint, in writing, with the Township Committee, which shall conduct an investigation or appoint one (1) or more individuals to conduct the same, including informal hearings, as is deemed proper. If the matter is not settled, the Township Committee shall conduct a fair and impartial hearing, upon due notice to the claimant. The Township Committee shall take whatever steps are necessary to ensure that said hearing is fair and impartial. The evidence submitted at the hearing shall not be governed or limited by the rules of evidence. All proceedings at the hearing shall be recorded but need not be transcribed unless the decision is to be reviewed. The Township Committee shall make a determination of facts and an order disposing of the issues presented. A copy of the order shall be served upon the claimant by registered mail. Said order is subject to appropriate judicial review by the claimant, in which case the claimant shall bear the cost of recording and transcribing the proceedings.

J. Penalties for false statements or representations. If any person making a claim under this plan makes a false statement or representation knowing it to be false or knowingly fails to disclose a material fact, such action will immediately disqualify such person for any benefit under this plan, as well as any benefits that were already paid based upon reliance on said false statements or representations or material omissions. Said action will also be grounds for disciplinary action, up to and including termination of employment. The township reserves the right to pursue any other available sanctions against any individual committing these acts, including prosecutor under applicable state law.

D. The township shall not pay back compensation based on the adjusted service date of a township employee, and any pay increases subsequent to the adjusted service date shall be effective from the adjusted service date only if the requirements and conditions set forth in Subsection A are satisfied.

E. The township, in granting adjusted service dates to its employees, shall not purchase back any pension benefits received by the affected employee as a result of previous employment with the township; however, if an affected employee desires to purchase back his/her pension, he/she will have an opportunity to do so upon payment of the full pension amount.

ARTICLE I

STATUTORY AUTHORIZATION, FINDINGS OF FACT, PURPOSE AND OBJECTIVES

93-1 STATUTORY AUTHORIZATION

The Legislature of the State of New Jersey has in N.J.S.A. 40:48-1, *et seq.*, delegated the responsibility to local governmental units to adopt regulations designed to promote public health, safety, and general welfare of its citizenry. Therefore, the Township Committee of the Township of Lower Alloways Creek of Salem County, New Jersey does ordain as follows:

93-2 Flood Damage Ordinance

93-2 FINDINGS OF FACT

- a) The flood hazard areas of the Township of Lower Alloways Creek are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety, and general welfare.
- b) These flood losses are caused by the cumulative effect of obstructions in areas of special flood hazard which increase flood heights and velocities, and when inadequately anchored, causes damage in other areas. Uses that are inadequately floodproofed, elevated or otherwise protected from flood damage also contribute to the flood loss.

93-3 STATEMENT OF PURPOSE

It is the purpose of this ordinance to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

- a) Protect human life and health;
- b) Minimize expenditure of public money for costly flood control projects;
- c) Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
- d) Minimize prolonged business interruptions;
- e) Minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets, bridges located in areas of special flood hazard;
- f) Help maintain a stable tax base by providing for the second use and development of areas of special flood hazard so as to minimize future flood blight areas;
- g) Ensure that potential buyers are notified that property is in an area of special flood hazard; and
- h) Ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

93-4 METHODS OF REDUCING FLOOD LOSSES

In order to accomplish its purposes, this ordinance includes methods and provisions for:

- a) Restricting or prohibiting uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;
- b) Requiring that uses vulnerable to floods including facilities which serve such uses, be protected against flood damage at the time of initial construction;
- c) Controlling the alteration of natural floodplains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;
- d) Controlling filling, grading, dredging, and other development which may increase flood damage; and,
- e) Preventing or regulating the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards in other areas.

ARTICLE II
DEFINITIONS

93-5 DEFINITIONS

Unless specifically defined below, words or phrases used in this ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its most reasonable application.

AO Zone- Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are between one and three feet.

AH Zone- Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are between one and three feet. Base Flood Elevations (BFEs) derived from detailed hydraulic analyses are shown in this zone

Appeal — A request for a review of the Local Administrator's interpretation of any provision of this ordinance or a request for a variance.

Area of Shallow Flooding — A designated AO or AH zone on a community's Digital Flood Insurance Rate Map (DFIRM) with a one percent annual or greater chance of flooding to an average depth of one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

Area of Special Flood Hazard — Land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. It is shown on the FIRM as Zone V, VE, V1-30, A, AO, A1-A30, AE, A99, or AH.

Base Flood — A flood having a one percent chance of being equaled or exceeded in any given year.

Base Flood Elevation (BFE) – The flood elevation shown on a published Flood Insurance Study (FIS) including the Flood Insurance Rate Map (FIRM). For zones AE, AH, AO, and A1-30 the elevation represents the water surface elevation resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year. For zones VE and V1-30 the elevation represents the stillwater elevation (SWEL) plus wave effect (BFE = SWEL + wave effect) resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year.

Basement — Any area of the building having its floor subgrade (below ground level) on all sides.

Breakaway Wall — A wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or supporting foundation system.

Coastal A Zone – The portion of the Special Flood Hazard Area (SFHA) starting from a Velocity (V) Zone and extending up to the landward Limit of the Moderate Wave Action delineation. Where no V Zone is mapped the Coastal A Zone is the portion between the open coast and the landward Limit of the Moderate Wave Action delineation. Coastal A Zones may be subject to wave effects, velocity flows, erosion, scour, or a combination of these forces. Construction and development in Coastal A Zones is to be regulated the same as V Zones/Coastal High Hazard Areas.

Coastal High Hazard Area — An area of special flood hazard extending from offshore to the inland limit of a primary frontal dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources.

Cumulative Substantial Improvement — Any reconstruction, rehabilitation, addition, or other improvement of a structure that equals or exceeds 50 percent of the market value of the structure at the time of the improvement or repair when counted cumulatively for 10 years.

Development — Any man made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations, or storage of equipment or materials located within the area of special flood hazard.

Digital Flood Insurance Rate Map (DFIRM) — The official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

Elevated Building — A non-basement building (i) built, in the case of a building in an Area of Special Flood Hazard, to have the top of the elevated floor or, in the case of a building in a Coastal High Hazard Area or Coastal A Zone, to have the bottom of the lowest horizontal structural member of the elevated floor, elevated above the base flood elevation plus freeboard by means of piling, columns (posts and piers), or shear walls parallel to the flow of the water, and (ii) adequately anchored so as not to impair the structural integrity of the building during a flood up to the magnitude of the base flood. In an Area of Special Flood Hazard "elevated building" also includes a building elevated by means of fill or solid foundation perimeter walls with openings sufficient to facilitate the unimpeded movement of flood waters. In Areas of Coastal High Hazard Area or Coastal A Zones "elevated buildings" also includes a building otherwise meeting the definition of "elevated building" even though the lower area is enclosed by means of breakaway walls.

Erosion — The process of the gradual wearing away of land masses.

Existing Manufactured Home Park or Subdivision — A manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of the floodplain management regulations adopted by a community.

Flood or Flooding — A general and temporary condition of partial or complete inundation of normally dry land areas from:

- a) The overflow of inland or tidal waters and/or
- b) The unusual and rapid accumulation or runoff of surface waters from any source.

Flood Insurance Rate Map (FIRM) — The official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

Flood Insurance Study (FIS) — The official report in which the Federal Insurance Administration has provided flood profiles, as well as the Flood Insurance Rate Map(s) and the water surface elevation of the base flood.

Floodplain Management Regulations — Zoning ordinances, subdivision regulations, building codes, health regulations, special purpose ordinances (such as a floodplain ordinance, grading ordinance and erosion control ordinance) and other applications of police power. The term describes such State or local regulations, in any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

Floodproofing — Any combination of structural and nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

Floodway — The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without accumulatively increasing the water surface elevation more than 0.2 foot.

Freeboard — A factor of safety usually expressed in feet above a flood level for purposes of flood plain management. “Freeboard” tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.

Highest Adjacent Grade — The highest natural elevation of the ground surface prior to construction next to the proposed or existing walls of a structure.

Historic Structure — Any structure that is:

- a) Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- b) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
- c) Individually listed on a State inventory of historic places in States with historic preservation programs which have been approved by the Secretary of the Interior; or

- d) Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
- (1) By an approved State program as determined by the Secretary of the Interior; or
 - (2) Directly by the Secretary of the Interior in States without approved programs.

Limit of Moderate Wave Action (LiMWA) – Inland limit of the area affected by waves greater than 1.5 feet during the Base Flood. Base Flood conditions between the V Zone and the LiMWA will be similar to, but less severe than those in the V Zone.

Lowest Floor — The lowest floor of the lowest enclosed area [including basement]. An unfinished or flood resistant enclosure, useable solely for the parking of vehicles, building access or storage in an area other than a basement is not considered a building's lowest floor provided that such enclosure is not built so to render the structure in violation of other applicable non-elevation design requirements of 44 CFR Section 60.3.

Manufactured Home — A structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. The term "manufactured home" does not include a "recreational vehicle".

Manufactured Home Park or Manufactured Home Subdivision — A parcel (or contiguous parcels) of land divided into two (2) or more manufactured home lots for rent or sale.

New Construction — Structures for which the start of construction commenced on or after the effective date of a floodplain regulation adopted by a community and includes any subsequent improvements to such structures.

New Manufactured Home Park or Subdivision — A manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of the floodplain management regulations adopted by the municipality.

Primary Frontal Dune — A continuous or nearly continuous mound or ridge of sand with relatively steep seaward and landward slopes immediately landward and adjacent to the beach and subject to erosion and overtopping from high tides and waves from coastal storms. The inland limit of the primary frontal dune occurs at the point where there is a distinct change from the relatively steep slope to a relatively mild slope.

Recreational Vehicle — A vehicle which is [i] built on a single chassis; [ii] 400 square feet or less when measured at the longest horizontal projections; [iii] designed to be self-propelled or permanently towable by a light duty truck; and [iv] designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

Sand Dunes — Naturally occurring or man-made accumulations of sand in ridges or mounds landward of the beach.

Start of Construction — For other than new construction or substantial improvements under the Coastal Barrier Resources Act (P.L. No. 97-348) includes substantial improvements and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site such as the pouring of a slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation, or the placement of a manufactured home on a foundation.

Permanent construction does not include land preparation, such as clearing, grading and filling nor does it include the installation of streets and/or walkways, nor does it include excavation for a basement, footings or piers, or foundations or the erection of temporary forms, nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

Structure — A walled and roofed building, a manufactured home, or a gas or liquid storage tank that is principally above ground.

Substantial Damage — Damage of any origin sustained by a structure whereby the cost of restoring the structure to it's before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred. Substantial Damage also means flood-related damages sustained by a structure on two or more separate occasions during a 10-year period for which the cost of repairs at the time of each such flood event, on the average, equals or exceeds 25 percent of the market value of the structure before the damages occurred.

Substantial Improvement — Any reconstruction, rehabilitation, addition, or other improvement of a structure during a 10-year period the cost of which equals or exceeds 50 percent of the market value of the structure before the "start of construction" of the improvement.

Substantial improvement also means "cumulative substantial improvement." This term includes structures which have incurred "substantial damage", regardless of the actual repair work performed or "repetitive loss". The term does not, however, include either:

- (1) Any project for improvement of a structure to correct existing violations of State or local health, sanitary or safety code specifications which have been identified by the local code enforcement officer and which are the minimum necessary to assure safe living conditions; or
- (2) Any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure".

Variance — A grant of relief from the requirements of this ordinance that permits construction in a manner that would otherwise be prohibited by this ordinance.

Violation — The failure of a structure or other development to be fully compliant with this ordinance. A new or substantially improved structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in 44 CFR §60.3(b)(5), (c)(4), (c)(10), (e)(2), (e)(4), or (e)(5) is presumed to be in violation until such time as that documentation is provided.

This ordinance shall not create liability on the part of the Township of Lower Alloways Creek any officer or employee thereof or the Federal Insurance Administration, for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made thereunder.

ARTICLE IV

ADMINISTRATION

93-13 ESTABLISHMENT OF DEVELOPMENT PERMIT

A Development Permit shall be obtained before construction or development begins, including placement of manufactured homes, within any area of special flood hazard established in section 93- 7. Application for a Development Permit shall be made on forms furnished by the local administrator and may include, but not be limited to; plans in duplicate drawn to scale showing the nature, location, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities; and the location of the foregoing. Specifically, the following information is required:

- a) Elevation in relation to mean sea level, of the lowest floor (including basement) of all structures;
- b) Elevation in relation to mean sea level to which any structure has been floodproofed.
- c) Certification by a registered professional engineer or architect that the floodproofing methods for any nonresidential structure meet the floodproofing criteria in section 93-33; and,
- d) Description of the extent to which any watercourse will be altered or relocated as a result of proposed development.

93-14 DESIGNATION OF THE LOCAL ADMINISTRATOR

The local administrator in Lower Alloways Creek Township is the Construction Code Official and he/she is hereby appointed to administer and implement this ordinance by granting or denying development permit applications in accordance with its provisions.

93-15 DUTIES AND RESPONSIBILITIES OF THE ADMINISTRATOR

Duties of the local administrator shall include, but not be limited to:

93-16 PERMIT REVIEW

- a) Review all development permits to determine that the permit requirements of this ordinance have been satisfied.
- b) Review all development permits to determine that all necessary permits have been obtained from those Federal, State or local governmental agencies from which prior approval is required.
- c) Review all development permits to determine if the proposed development is located in the floodway. If located in the floodway, assure that the encroachment provisions of 93-35 a) are met.
- d) Review all development permits in the Coastal High Hazard and Coastal A Zone area of the area of special flood hazard to determine if the proposed development alters the terrain or sand dunes so as to increase potential flood damage.
- e) Review plans for walls to be used to enclose space below the base flood level in accordance with section 93-38 d).

93-17 USE OF OTHER BASE FLOOD AND FLOODWAY DATA

When base flood elevation and floodway data has not been provided in accordance with section 93-7, BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD, the local administrator shall obtain, review, and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other source, in order to administer sections 93-32, SPECIFIC STANDARDS, RESIDENTIAL CONSTRUCTION, and 93-33, SPECIFIC STANDARDS, NONRESIDENTIAL CONSTRUCTION.

93-18 INFORMATION TO BE OBTAINED AND MAINTAINED

- a) Obtain and record the actual elevation (in relation to mean sea level) of the lowest floor (including basement) of all new or substantially improved structures, and whether or not the structure contains a basement.
- b) For all new or substantially improved floodproofed structures:
 - i. verify and record the actual elevation (in relation to mean sea level); and
 - ii. maintain the floodproofing certifications required in section 93-13 c).
- c) In Coastal High Hazard and Coastal A Zone areas, certification shall be obtained from a registered professional engineer or architect that the provisions of 93-38 a) and 93-38 b) i. and ii. are met.
- d) Maintain for public inspection all records pertaining to the provisions of this ordinance.

93-19 ALTERATION OF WATERCOURSES

- a) Notify adjacent communities and the New Jersey Department of Environmental Protection, Dam Safety and Flood Control Section and the Land Use Regulation Program prior to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Insurance Administration.
- b) Require that maintenance is provided within the altered or relocated portion of said watercourse so the flood carrying capacity is not diminished.

93-20 SUBSTANTIAL DAMAGE REVIEW

- a) After an event resulting in building damages, assess the damage to structures due to flood and non-flood causes.
- b) Record and maintain the flood and non-flood damage of substantial damage structures and provide a letter of Substantial Damage Determination to the owner and the New Jersey Department of Environmental Protection, Dam Safety and Flood Control Section.
- c) Ensure substantial improvements meet the requirements of sections 93-32, SPECIFIC STANDARDS, RESIDENTIAL CONSTRUCTION, and 93-33, SPECIFIC STANDARDS, NONRESIDENTIAL CONSTRUCTION.

93-21 INTERPRETATION OF FIRM BOUNDARIES

Make interpretations where needed, as to the exact location of the boundaries of the areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field conditions). The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in section 93-22.

93-22 VARIANCE PROCEDURE

93-23 APPEAL BOARD

- a) The Planning / Zoning Board as established by Township Committee shall hear and decide appeals and requests for variances from the requirements of this ordinance.
- b) The Planning / Zoning Board shall hear and decide appeals when it is alleged there is an error in any requirement, decision, or determination made by the local administrator in the enforcement or administration of this ordinance.
- c) Those aggrieved by the decision of the Planning / Zoning Board or any taxpayer, may appeal such decision to the Superior Court of New Jersey, as provided by New Jersey statute.
- d) In passing upon such applications, the Planning / Zoning Board shall consider all technical evaluations, all relevant factors, standards specified in other sections of this ordinance, and:
 - i. the danger that materials may be swept onto other lands to the injury of others;
 - ii. the danger to life and property due to flooding or erosion damage;
 - iii. the susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
 - iv. the importance of the services provided by the proposed facility to the community;
 - v. the necessity to the facility of a waterfront location, where applicable;
 - vi. the availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;
 - vii.

Flood Damage Prevention 93-23

- viii. the compatibility of the proposed use with existing and anticipated development;
 - ix. the relationship of the proposed use to the comprehensive plan and floodplain management program of that area;
 - x. the safety of access to the property in times of flood for ordinary and emergency vehicles;
 - xi. the expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters and the effects of wave action, if applicable, expected at the site; and,
 - xii. the costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water systems, and streets and bridges.
- e) Upon consideration of the factors of section 93-23 d) and the purposes of this ordinance, the Planning / Zoning Board may attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.
- f) The local administrator shall maintain the records of all appeal actions, including technical information, and report any variances to the Federal Insurance Administration upon request.

93-24 CONDITIONS FOR VARIANCES

- a) Generally, variances may be issued for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing items i.-xi. in section 93-23 d) have been fully considered. As the lot size increases beyond the one-half acre, the technical justification required for issuing the variance increases.
- b) Variances may be issued for the repair or rehabilitation of historic structures upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as a historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.
- c) Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.
- d) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
- e) Variances shall only be issued upon:
- i. A showing of good and sufficient cause;
 - ii. A determination that failure to grant the variance would result in exceptional hardship to the applicant; and,
 - iii. A determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public as identified in section 93-23 d), or conflict with existing local laws or ordinances.
- f) Any applicant to whom a variance is granted shall be given written notice that the structure will be permitted to be built with a lowest floor elevation below the base flood elevation and that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced lowest floor elevation.

ARTICLE V

 - iv. Be elevated on a permanent foundation such that the top of the lowest floor is at or above the base flood elevation plus one (1) foot or as required by ASCE/SEI 24-14, Table 2-1, whichever is more restrictive.

93-35 FLOODWAYS

Located within areas of special flood hazard established in section 93-8 are areas designated as floodways. Since the floodway is an extremely hazardous area due to the velocity of flood waters which carry debris, potential projectiles, and erosion potential, the following provisions apply:

- a) Prohibit encroachments, including fill, new construction, substantial improvements, and other development unless a technical evaluation demonstrates that encroachment shall not result in any increase in flood levels during the occurrence of the base flood discharge.
- b) If section 93-35 a) is satisfied, all new construction and substantial improvements must comply with Article V PROVISIONS FOR FLOOD HAZARD REDUCTION.
- c) In all areas of special flood hazard in which base flood elevation data has been provided and no floodway has been designated, the accumulative effect of any proposed development, when combined with all other existing and anticipated development, shall not increase the water surface elevation of the base flood more than two-tenths (0.2) of a foot at any point.

93-36 COASTAL HIGH HAZARD AREA AND COASTAL A ZONE

Coastal High Hazard Areas and Coastal A Zones are located within the areas of special flood hazard established in section 93-8. These areas may be subject to wave effects, velocity flows, erosion, scour, or a combination of these forces; therefore, the following provisions shall apply:

93-37 LOCATION OF STRUCTURES

- a) All buildings or structures shall be located landward of the reach of the mean high tide.
- b) The placement of manufactured homes shall be prohibited, except in an existing manufactured home park or subdivision.
- c) Prohibit the use of fill for structural support of buildings within (VE and V Zones) Coastal A Zones on the community's FIRM.

93-38 CONSTRUCTION METHODS

a) ELEVATION

All new construction and substantial improvements shall be elevated on piling or columns so that:

- i. The bottom of the lowest horizontal structural member of the lowest floor (excluding the piling or columns) is elevated to or above the base flood elevation plus one (1) foot, or as required by ASCE/SEI 24-14, Table 4-1, whichever is more restrictive, and,
- ii. With all space below the lowest floor's supporting member open so as not to impede the flow of water, except for breakaway walls as provided or in section 93-38 d).

b) STRUCTURAL SUPPORT

- i. All new construction and substantial improvements shall be securely anchored on piling or columns.
- ii. The pile or column foundation and structure attached thereto shall be anchored to resist flotation, collapse or lateral movement due to the effects of wind and water loading values each of which shall have a one percent chance of being equaled or exceeded in any given year (100-year mean recurrence interval).
- iii. There shall be no fill used for structural support.

c) CERTIFICATION

A registered professional engineer or architect shall develop or review the structural design specifications and plans for the construction and shall certify that the design and methods of construction to be used are in accordance with accepted standards of practice for compliance with the provisions of section 93-38 a) and 93-38 b) i. and ii.

d) SPACE BELOW THE LOWEST FLOOR

- i. Any alteration, repair, reconstruction or improvement to a structure started after the enactment of this ordinance shall not enclose the space below the lowest floor unless breakaway walls, open wood lattice-work or insect screening are used as provided for in this section.

- ii. Breakaway walls, open wood lattice-work or insect screening shall be allowed below the base flood elevation provided that they are intended to collapse under wind and water loads without causing collapse, displacement or other structural damage to the elevated portion of the building or supporting foundation system. Breakaway walls shall be designed for a safe loading resistance of not less than 10 and no more than 20 pounds per square foot. Use of breakaway walls which exceed a design safe loading of 20 pounds per square foot (either by design or when so required by local or State codes) may be permitted only if a registered professional engineer or architect certifies that the designs proposed meet the following conditions.
 - (i) breakaway wall collapse shall result from a water load less than that which would occur during the base flood and,
 - (ii) the elevated portion of the building and supporting foundation system shall not be subject to collapse, displacement or other structural damage due to the effects of wind and water load acting simultaneously on all building components (structural and non-structural). Water loading values used shall be those associated with the base flood. Wind loading values used shall be those required by applicable State or local building standards.
- iii. If breakaway walls are utilized, such enclosed space shall be used solely for parking of vehicles, building access, or storage and not for human habitation.
- iv. Prior to construction, plans for any breakaway wall must be submitted to the Construction Code Official or Building Sub-Code Official for approval.

93-39 SAND DUNES

Prohibit man-made alteration of sand dunes within Coastal A Zones (V and VE Zones) on the community's DFIRM which would increase potential flood damage.

C. If said property owner, after receiving second notice of connection, does not connect to the township's existing sewerage system within thirty (30) days of receipt of the second notice, the township has the right to enter onto the premises and cause a lateral or such other piping, as approved by the Township Engineer, to be installed on the owner's property and connected to the township's existing sewerage system.

 3. Once the lateral pipe has been cut, the contractor shall have the option of either plugging the main side portion of the lateral with an 18 (eighteen) inch long cement plug or capping the cut lateral with a Fernco type cap. The Cap or Plug shall be inspected by the Superintendent of Public Works or his/her designee before any backfill of the excavation is begun.
 4. The end of the lateral's location is to be marked with a post (1-inch plastic pipe or similar non-decaying material) from the end of the lateral to ground grade. The post is to be marked "Sanitary Sewer Lateral".
 5. Backfill for either permanent or temporary abandonment shall be NJDOT DGA or select fill in compacted lifts.
 6. The Superintendent of Public Works or his/her designee will locate the lateral to be Disconnected
 7. No person other than a licensed plumber, licensed by the State of New Jersey, shall be permitted to disconnect and cap, cut off and cap, or sever and cap any water or sewer service from any property or structure in the Township of Lower Alloways Creek unless so authorized in writing by the Superintendent of Public Works or his/her duly authorized designee.

Said permit shall be issued by the Superintendent of Public Works or his/her designee upon the applicant obtaining all the required permits, permissions and payment of **twenty-five dollars (\$25)** fee to the Utility Collector. Said disconnection must occur prior to the demolition of the building. Any excavation within ten (10) feet of a riser and the actual disconnection shall be made in the presence of the Superintendent of Public Works or his/her duly authorized representative.

2. Disconnection of sewer services other than demolition

- a. In the event that the Owner of a property desires to disconnect sewer service from the Township's sewer system, for reasons other than found in Section A above, the Owner shall file an Application for Disconnection (Exhibit D) with the Superintendent of Public Works or his/her designee accompanied by a fee of **Fifty Dollars (\$50)** to the Utility Collector. The disconnection must be for a period of not less than one (1) year. Once the disconnection has been approved by the Township's Zoning Officer, Construction Code Official and Superintendent of Public Works, the Application for Disconnection shall be considered for approval by a resolution of the Township Committee. Following approval of the Application for Disconnection by the Township Committee, the Owner shall not be subject to the annual service charge beginning on the first day of the month following the approval. If and when the Owner elects to re-connect to the Township's sewer system, the connection shall be considered a new connection and shall be subject to all the fees and requirements so enumerated in this Chapter. This provision does not apply to temporary disconnections for the maintenance of the property owners lateral
- b. All water closets, urinals, sinks, bathtubs, washbasins, washtubs and other fixtures for receiving wastewaters located in or connected with any structure for which sewer service is disconnected and for which connection with the sewer system is mandatory shall be removed. Officers on the scene may use their discretion when deviating from the normal rotation, if such deviation is practical and reasonable based on the accident location, sequential operator availability, and proximity of the vehicle or vehicles in question to an approved operator. Nothing in this chapter shall be construed to preclude the owner of any vehicle from requesting service from either an approved operator of the owner's choice, or a towing contractor not on the approved list. The owner's discretion may be utilized so long as that discretion shall not result in an unreasonable delay or interference with the normal flow of traffic such as to constitute a hazard.

[Amended 9/21/2010 by Ord No. 2010-10]
- F. The relationship between approved operators and Lower Alloways Creek Township is one of independent contractor. Approved operators shall not be construed in any manner to be employees or agents of the Township. Each approved operator on the list agrees to defend, indemnify and save harmless the Township and its officials, employees and agents from and against any suits, actions, damages, claims, fees, costs, expenses, including attorneys' fees, fines or penalties to which the Township may be subject of any kind or nature whatsoever resulting from, caused by, arising out of or as a consequence of the provision of service provided at the request of the Township or any authorized person or entity acting on behalf of the Township. In the event the Township shall be responsible for towing and/or storage, then such specialized operator agrees that the fees established in this ordinance shall be the maximum fees allowable.

(the “company”), its successors and assigns to install, operate, inspect, maintain, repair, replace and remove its communications facilities and other transmission or process equipment, including underground facilities, such as conduits, manholes, cables, wires and all other facilities appurtenant thereto, and aboveground facilities, such as cables, wires, antennas, poles, posts, supports, guys, pedestals, cable termination and distribution cabinets and all other facilities appurtenant thereto, in, through, upon, along, over, under and across all of the various public streets and ways, which include the roads, avenues, rights-of-way, sidewalks, highways, bridges, waterways and other public places and parts thereof throughout their entire length, and to effect the necessary street openings and lateral connections to curb poles, property lines and other facilities in the Township of Lower Alloways Creek (the township) for said company’s local and through lines and other communications facilities in connection with the transaction of its business. In the event that any public street or way where the company has facilities is vacated by the township, the township agrees to reserve unto said company the rights granted the company by the present ordinance.

§ A 162-2. Placement of facilities.

All poles, posts, pedestals, cabinets or other facilities shall be located and placed back of the curb lines where shown on the Official Map(s) of the township; the poles and posts, however, shall be located within eighteen (18) inches of the face of such curb line, or as may otherwise be mutually agreed by both parties, or at the points or places now occupied by the poles, posts, pedestals, cabinets or other facilities of the company, its successors and assigns and, where there are no curb lines, at other convenient points or places in, upon, along, adjacent or across the public streets and ways as may be mutually agreed upon between the parties.

§ A162-3. Underground facilities.

The company may bury its local and through communications facilities, such as cables, conduits, manholes and associated equipment, fixtures, process equipment and appurtenances, within the right-of-way of the various public streets and ways and at such locations as shall be mutually agreed upon by the parties for said company's local and through lines and communications facilities. Underground conduits and associated facilities, as aforementioned, shall be placed at least eighteen (18) inches below the surface of said public streets and ways and, with the exception of lateral branches to curb poles and property lines and other facilities, the same shall generally not be constructed more than ten (10) feet from the curb line, unless obstructions make it necessary to deviate from such course or unless the parties mutually agree to another location. Manholes shall be located at such points along the line of underground conduits as may be necessary or convenient for placing, maintaining and operating the facilities, as aforementioned, which the company may from time to time use in connection with its underground conduit system and shall be so constructed as to conform to the cross-sectional and longitudinal grade of the surface so as not to interfere with the safety or convenience of persons or vehicles.

§ A162-4. Notice required prior to performing work; permits; restoration; duration of encumbrances.

§ A162-6. Relation of facilities to new curb lines.

Whenever a curb line shall be established on streets where one does not now exist or where an established curb line shall be relocated in order to widen an existing street in conjunction with road construction being performed by the township, the company shall change the location of its aboveground facilities covered by this ordinance in accordance with applicable law, so that the same shall be back of and adjacent to the new curb line, so long as the township has acted in accordance with applicable law and with reasonable care in establishing the new curb line and providing notice thereof.

§ A162-7. Use of facilities by others.

Any company or corporation having legal authority to place its facilities in the public streets and ways of the township may jointly use the company's poles, posts, pedestals or other structures for all lawful purposes, provided that the company consents to such use, on terms and conditions acceptable to the company and not inconsistent with the provisions of the present ordinance.

§ A162-8. Use of facilities by township.

- A. The company shall provide space, to the extent available, on its poles so long as said poles are occupied by the company and space, to the extent available, in its main conduits existing on the date of passage of this ordinance, but not exceeding one (1) duct of standard size, for the sole benefit of the township during the pendency of this ordinance.

- C. All costs or expenses incurred by the company in connection therewith shall be paid by the township.
- D. It shall be the obligation of the township to attach its wires to the poles or place its electric conductors in the conduits or manholes of the company, provided that before proceeding with said work, either by itself or by a person, firm or corporation engaged to perform such work, the township shall give the company thirty (30) days' prior notice in writing.

E. All such work shall be performed under the supervision of said company.

F. The township will indemnify and save harmless the company from and against all claims, liabilities or demands arising in any manner in connection with the township's wires or facilities or their installation, maintenance, operation or removal or the township's use or enjoyment of the company's plant or facilities provided under this section.

§ A 162-9. Effect of street vacations.

If any or all of said streets or ways are later taken over by the County of Salem or the State of New Jersey, such county or state shall have such rights and privileges and be subject to the same terms, conditions and limitations of use as apply herein to the township; provided, however, that satisfactory prior arrangements as may be necessary are made with the township and the company for the full protection of the respective interest of each.

The term "township," as used in this ordinance, shall be held to apply to and include any form of municipality or government into which the township or any part thereof may at any time hereafter be changed, annexed or merged.

This ordinance shall cancel and supersede all prior consent ordinances between the township and the company regarding the subject matter hereof.

§ A 162-12. Additional conditions.

The company shall maintain its property within the township and shall comply with applicable law for the provision of safe, adequate and proper service at just and reasonable rates and safeguard the public interest in continuous and uninterrupted service within the township.

§ A162-13. Severability.

In the event that any provision herein shall for any reason be illegal or unenforceable under applicable law, such illegality or unenforceability shall not affect any other provisions of this ordinance, and this ordinance shall be construed as if such illegal or unenforceable provision(s) had never been contained herein.

§ A162-14. Advertising costs; notice; when effective.

A. The company shall pay the expenses incurred for advertising required in connection with the passage of this ordinance, after the date of its first reading, within thirty (30) days after the company has received a bill for said advertising from the publisher. Following final passage of this ordinance, the Township Clerk shall provide the company with written notice thereof by certified mail.

- § 184-3. **Copies on file.**

[HISTORY: Adopted by the Board of Health of the Township of Lower Alloways Creek 3-17- 78 as Ord. No. H-78-1. Amendments noted where applicable.]

§ 184-1. Adoption of standards.

Under the provisions of N.J.S.A. 26:3-69.1 to 3-69.6, the Swimming Pool Code of New Jersey is adopted by Lower Alloways Creek Township Board of Health as the Swimming Pool Code of the municipality of Lower Alloways Creek. This code provides procedures for obtaining approval to locate and construct or alter a pool and specifications for public pools' construction, diving stands and boards, wading pools, recirculative systems, filtration of water, its disinfection and disposal, dressing rooms, showers, toilets and lavatories, emergency equipment, supervision and maintenance and bathing water quality. It defines nonconforming pools as a nuisance.

In addition to the foregoing penalty, any defendant upon his second conviction within the space of six (6) months of a violation of the Swimming Pool Code may be imprisoned in the county jail as provided by law.

§ 184-3. Copies on file.

Three (3) copies of the Swimming Pool Code are attached to and made a part of this chapter and are filed with the Secretary of the Municipal Board of Health and will remain in the office of the Secretary from the introduction of this chapter at a meeting held on the 17th day of February 1978, at the Municipal Building, Hancock's Bridge, New Jersey, until the final action is taken on the proposed ordinance, for the use and examination of the public.
